WHAT IS JOB SHADOWING?

Students follow around a professional—like a shadow—for part of their work day. During a job shadow, students gain firsthand knowledge of a job and this helps them get a clearer picture of what their future could look like.

WHY JOB SHADOW?

Students can see if a job could be a good fit before making a big commitment. Through a job shadow, students can discover what they like, don't like, or what they didn't even know existed! At the end of the day, students learn a little more about themselves and taking steps to shape their future.
